

ION247 leverages the business values and lessons learned of two longtime business relationships. On March 1st, 2015 ION247, LLC was formed as the Managed Services business unit of Star Asset Security, LLC. The entity was formed to combine the former Netxfolio, LLC (IT Managed Services Provider) and Interactive Video Technologies (Video and Security Managed Services Provider) rebranded as ION247.

The entity and name are new to some, but the entities have been working together to provide remote cloud based information systems and physical security solutions since 2011. The technology platforms deployed to provide these services especially in the Small Mid-Market are getting lighter, with IP endpoints on premise and management/intelligence in the Cloud.

This is a massive change for legacy IT and Security Systems Integrators that typically design and build custom on premise solutions (many are struggling to adapt to the new service delivery models). The new “ION247” is built specifically to support a standard set of IT and Physical Security applications leveraging the benefits of the Cloud. Welcome to the “New” ION247.
